

## Is monitoring your drivers driving YOU nuts?

### LOWER RISK

Easily identify high-risk drivers by integrating individual driver data into risk-management software.

### MAINTAIN SAFETY

Proactively target and modify errant driving behavior to reduce accidents.

### ENSURE COMPLIANCE

Stay ahead of issues that cause steep, costly fines.

### ENABLE FULL-CIRCLE PROCESS

Initial approval, ongoing monitoring, and archiving in one place. Continuously monitors and scores Motor Vehicle Reports.

### REDUCE HUMAN ERROR

Automated process identifies critical driving behavior and sends recent activity and timely alerts.

### STANDARDIZE SCORING

Assess individual driver performance independent of each state's point system.

## Data Facts Driver Monitoring™

Samba Safety's DriverMonitor® is the foundation of the Data Facts **Driver Monitoring Risk Management™** solution as it automates the management of driver-related information for your commercial and non-commercial drivers. This industry-leading driver monitoring solution manages all driver data and automatically checks for new violations, DUI/DWI convictions, invalid licenses, and approaching license or medical certification expiration dates. Each month concise reports identify new citations and actions and alerts you to the most critical driver behavior issues.
